Section 1

TYPES OF METRICS

Quantitative metrics that are calculated based on the result of the period. As a rule, they are in uenced by actionable metrics and other result or costs metrics

Metrics, which are typically show the ratio of two other metrics. They cannot be impacted directly (not actionable), but they show the state of the metrics that link

Metrics that can be directly impacted by speci c actions

Entry marketing costs that determine the volume of the rst step of the sales funnel

TYPES OF CONNECTIONS

Direct impact

Reverse impact

Direct connection without impact

Reverse connection without impact
